

Hello Everybody,

One of the most popular questions we get from agents is how can I get my site to show up on the first page of a Google search result. This is an aged old question and as I have discussed in previous newsletters, there are a variety of ways to try to increase your Google Rating "organically - ie not paying" but none of these provide you with any kind of guarantee and they also take time to work your way up. But as we all know, time is money and we need results quickly. For this reason, we are now partnering with a company called Breeze Max Web that specializes in just this, for a low monthly fee they will **GUARANTEE** your website will be listed on the very first page of Google[®], which controls 74% of Canada search. That is right, you have read correctly, read further for more details!
